

# COMPUTER TRAINING SYSTEMS

## HELICOPTER TRAINING

### CATALOG OF HELICOPTER TRAINING PROGRAMS AND SYSTEM TUTORIALS

We offer comprehensive training programs for each aircraft listed below. Typically, the minimum areas covered are normal procedures, emergency procedures, limitations, and onboard systems and procedures. Subjects include a mixture of interactive tutorials and text-based lessons, culminating in a final exam. Each course also includes administrator access to online record keeping in order to track and monitor individual pilot progress. All aircraft programs are designed to satisfy the recurrent ground training requirements of 14 CFR Part 135, Subpart H.
